Security Systems

Knowledge and experience to safeguard valuable industrial properties and provide construction site security. With our significant expertise and IP technology best practices, we build tailored security services to protect our clients' assets and people.

24/7 Remote Monitoring

We offer a true day one solution providing remotely monitored CCTV activated by video motion analytics. Working in partnership with a monitoring station we are able to action the police when unauthorised persons enter your site.

Off-Grid CCTV

Up to 400 days autonomous operation using our battery wireless monitored cameras. Additional solutions include Wind-Solar hybrid PowerPack to our cost effective BatteryPack charged from your generator.

Vacant Property Alarm

Rapid-deployment photo verified & monitored alarm system with multi-network SIM. Simple deployment and operation for site staff giving protection to building plots prior to handover, safeguarding valuable copper and heating boilers.

Mains & Battery options available.

Time Lapse & Media

Capture your build, installation, project or process with high quality 4K time lapse film. Short, medium and long term projects; you choose the duration to suit your aims and budget.

Site Communications

Free unlimited 5G / Broadband and WiFi included with rental security systems. Using external high gain antenna for increased data speeds.

Reliable connectivity, even in remote locations, with STARLINK and multi-network SIM's available as upgrade options if required.

Access Control

Facial Recognition and Cloud software, providing online inductions, delivery management and report on time & attendance, fire roll call and custom integration. Stand-alone kiosk terminal for time & attendance without a turnstile.

Computer Vision / Ai

Our cameras have capability to analyse the field of view and report on object behaviour. PPE monitoring, object counting and vehicle waiting are some of the available features.

Imagine a push-notification or siren if someone is not wearing a hard-hat?

Keyholding & Response

Partnering with trusted local security firm holding the keys and other access credentials for your property, providing a professional response to security issues such as alarm activations, false alarms, or emergencies

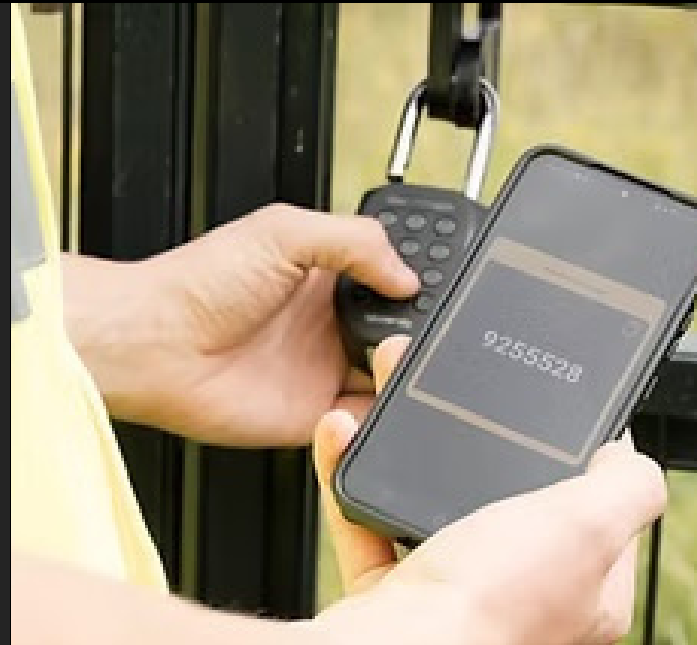

Physical Security

Securing sites with rising bollards, sliding gates and vehicle barriers. These can be linked to ANPR cameras and facial recognition for seamless entry with enhanced security and control.

Smart Padlock

Unlocking effortless control, guarantee access with bluetooth and timed passcode entry. Full audit trail of individual users, by pin or smartphone unlocking.

Special Projects

We tackle projects that often fall outside conventional parameters. With over 35 years of experience in electronic security, we thrive on addressing challenges that others struggle to solve.
